

Geology: Idaho Rocks
2020 Project Rubric

1. Your final project should be completed on or before July 30, 2020.
2. Your final project can take many different forms. It can be a unit plan, a video or photo diary that can be used to complete projects that you outline in your teaching context, a schoolyard geology field guide/ map, a sample collection that can be used by your school, etc. Simply approve your project idea with the course instructors.

	Outstanding	Acceptable	Unacceptable
Content Comprehension	Project is applicable and relevant to your teaching context. It shows understanding of the topics covered in class.	Project shows understanding of the topics covered in class.	Project does not show understanding of the topics covered in class and is not applicable or relevant to your teaching context.
Usability	It is obvious that significant work was put into the project to make it an outstanding product. Work is neat, complete, and immediately useable in your teaching context.	Work is mostly complete. One or two elements may be missing to make it immediately useable in your teaching context.	Work is not complete and it is obvious that the appropriate time was not put into the project.
Creativity	Project is creative and highlights how place-based geology education can be used in any subject area.	Project highlights how place-based geology education can be used in a geology course.	Project does not show adaptability to different subject areas or appropriate creativity in the subject area of geology.
